

# PALISADE FENCING

Reliable Perimeter Security for Demanding Environments

Our Palisade Security Fencing delivers robust perimeter protection for high-security needs. Ideal for schools, industrial sites, and more, this system deters intruders with its resilient, climb-resistant design. Available in 'D' or 'W' profiles, it features spiked tops, solid steel pales, and vandal-resistant elements, ensuring superior protection against unauthorized access and attacks. Powder-coated for blending or branding, this weather-resistant fencing adapts to sloping ground and guarantees longevity with hot-dip galvanization.

This versatile fencing solution also allows for additional security measures, including spiked tops, curved pales, and barbed wire options. Whether it's for general-purpose demarcation or high-security applications, Palisade Fencing offers durability, adaptability, and a formidable appearance to safeguard your premises.

## Specification

Height	1.2m to 4.0m
Pale Profiles	'D' or 'W'
Pale Thickness	Varied, based on section and security needs
Rails & Posts	Rolled steel angle, adaptable, Hot-dip galvanized, adaptable
Finish	Powder coating, various colors
Compliance	BS EN 1722-12, BS EN ISO 1461

### KEY FEATURES

- Vandal-resistant design
- Adaptable to sloping ground
- Weather-resistant finish
- Hot-dip galvanized for durability
- Matching Palisade gates available, heights to 5.0m, widths up to 16.0m
