

PLAYSAFE RAILINGS

Secure and Aesthetic Playground Perimeter Fencing

Crafted with a safety-first approach, the PlaySafe Railings offer a secure boundary for outdoor playgrounds and recreational areas with low to medium security risks. Designed specifically for nurseries, preschools, schools, public spaces, and family attractions, these railings prioritize child safety without compromising the creative and stimulating environment.

Meeting the BS: EN: 1176 playground equipment requirements, these railings maintain a maximum height of 2.4m, feature no gaps exceeding 89mm, and eliminate neck entrapments. Available in straight or curved designs, they ensure a child-safe play zone while offering design flexibility.

Specification

Height	Up to 2.4m
Gap Limit	Maximum 89mm
Mounting Options	Concrete or surface base plated
Gate Compliance	British Standards compliant
